

## Introduction

The Institution of Structural Engineer's Chartered Membership Examination is known for being a stern test for the structural engineer. There is no reason why a well prepared candidate should not pass the examination at the first attempt. This course will explain to the delegate what it is expected by the examiners and how to avoid automatic failures.

## Aims & Objectives

On completion of this course delegates will know what it is expected of a candidate for the Institution of Structural Engineer's Chartered Membership Examination and they will be able to prepare themselves ready to sit the exam.

After this course delegates will:

- Understand the examination process
- Understand how the examination will be assessed
- Know where to find design information
- Know how to complete the question in the time available
- Be able to develop a strategy for their own exam preparation
- Know the do's and don'ts of the examination

## Course Outline

- Introduction to the IStructE CM exam
- What are the examiners looking for?
- Approach to answering the question
- Development of solutions
- Design calculations
- Drawings
- Method statement and programmes
- Summary – being prepared and avoiding the pitfalls
